Why **TITANIUM?**

Because everybody would like use clear water!

- ♦ *We introduced a new technology of water treatment which makes the process of disinfection more effective than in any other systems used nowadays.*
- ♦ *In our devices we use our own patented UV lamp driver (which diminishes the power consumption, prolongs the lamps vitality and diminishes the solarization effect) and the module of advanced UV radiation control.*
- ♦ *In our device we use the titanic reactor as the element of advanced oxidation technology on which we offer the lifelong guarantee.*
